-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

Art Unit: 2829

1. In response to Applicant's Amendment and Response to the Restriction mailed on 9 August 2005, the requirement to elect has been withdrawn.

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-22, 39 and 40 drawn to apparatus, classified in class 324, subclass 763.
- II. Claim 23-32 drawn to method, classified in class 324, subclass 763.
- III. Claims 33-38, drawn to apparatus, classified in class 324, subclass 763.

3. The inventions are distinct, each from the other because:

Inventions I and III in a first set and II in a second set are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the apparatus, as disclosed in claim 1, can be used in a materially different process of using such as a method not requiring the use of a ring oscillator.

Inventions I and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the

subcombination as claimed because the combination can be practiced without an execution unit to execute instructions. The subcombination has separate utility not requiring functional blocks.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. A telephone call was made to the Office of the Attorney of Record on November 17, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

7. A shortened statutory period for response to this action is set to expire one month(s) from the date of this letter. Failure to respond within the period for response will cause the application to become abandoned. 35 U.S.C. 133
